

Vacuum Gripper System

(Foam Type)

Suitable for the palletizing and depalletizing of corrugated cardboard, etc.

Ejector unit

Combines all functions required for adsorption

Ejector

Supply valve/Release valve

Silencer

Pressure switch

IO-Link compatible*1

*1 Only for sizes 300 x 180 and 200 x 120

Can be used immediately by simply connecting 1 electrical cable and air piping

Compatible with the collaborative robots of 4 companies

UNIVERSAL ROBOTS
OMRON/TECHMAN ROBOT
FANUC
YASKAWA Electric

75 mm*1

200 mm

120 mm

*1 For foam thicknesses of 20 mm
Depending on the compatible robot

Weight

1.3 kg (200 x 120)

1.8 kg (300 x 180)

3.9 kg (400 x 240)

CO₂ emissions (Air consumption)

Max. **15%** reduction
(SMC comparison)

Ejector with new design

227 L/min (ANR) ← 270 L/min (ANR)

Compared to ZL6H (Supply pressure: 0.6 MPa)

Lifting force

440 N (200 x 120) (At -63 kPa)

880 N (300 x 180) (At -63 kPa)

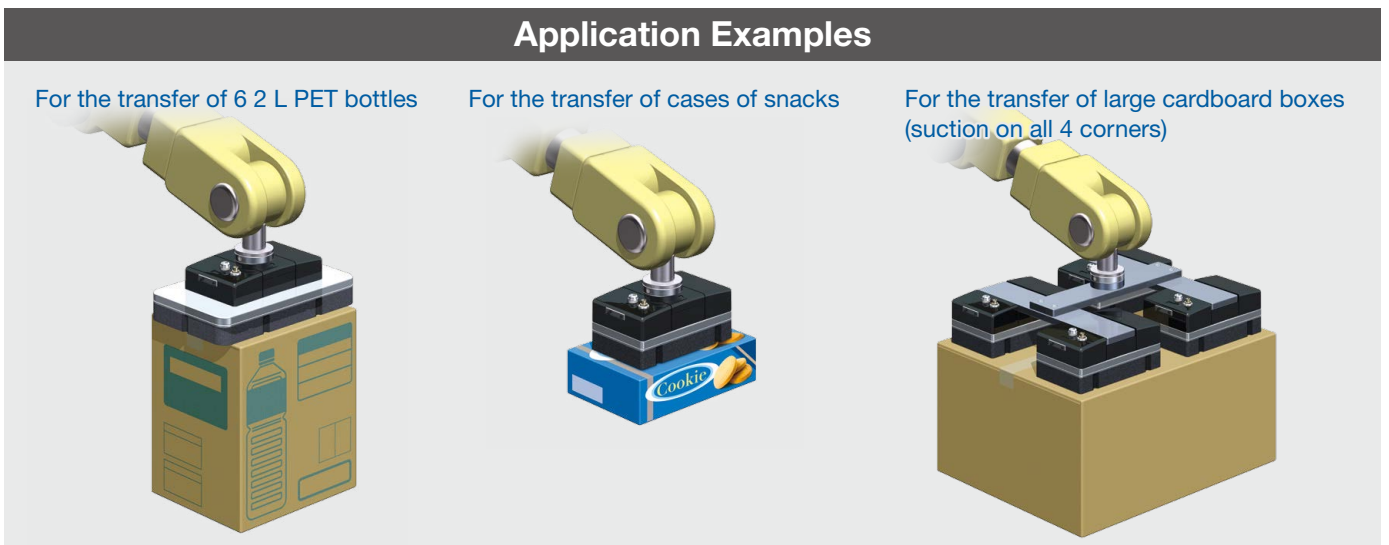

2144 N (400 x 240) (At -75 kPa)

ZGS Series

CAT.ES100-169B

Ejector Unit

Newly designed ejector for the Vacuum Gripper System

- Number of ejector assemblies (2 pcs, 4 pcs, 6 pcs) can be selected.

For size 400 x 240

Number of ejector assemblies	Suction flow rate [L/min (ANR)]
2	322
4	646
6	1022

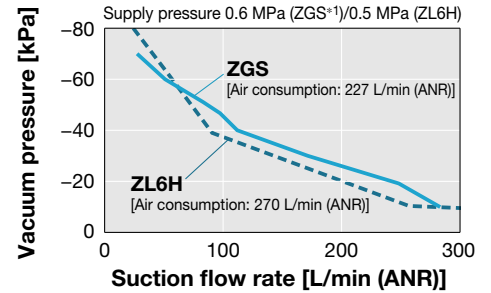

- * For details, refer to the ejector flow rate characteristics
- * The values are for reference only.

- Energy-saving (Air consumption reduced by up to 15% compared to ZL6H)

Flow rate characteristics improvement in the practical range below -50 kPa

Flow Rate Characteristics Comparison

*1 The flow rate characteristics for the single ejector unit when the ejector assembly is 4 pcs.

LED indicator for supply and release valve operation.

Easy tool changing due to common tool changer*1

*1 Only for sizes 300 x 180 and 200 x 120

• Easy tool changing (Manual changer)

- Tools can be secured by simply tightening the 2 clamber bolts.
- Reduces work-hours
- * Note that the lifting force may be limited when the tool plate and main plate are used. See the Suction Plate Selection Guide for details.

Ejector Unit

Built-in pressure switch. Pressure in a foam can be detected.

With $\varnothing 4$ One-touch fittings and polyurethane tubing

Selectable pressure detection ports (300 mm x 180 mm, 200 x 120 mm)

- Select from base plate pressure detection or foam hole pressure detection via the part number.
- Having the pressure detection ports within the ejector unit allows for a sleek appearance without any visible piping.
- This also eliminates the risk of piping getting pulled out.
- The pressure detection ports can be changed by the customer later.

Usage example of the pressure detection port in a foam hole

Pressure detection port in a foam hole

Example Pressure in a foam hole: 0 kPa
Detects the workpiece drop

Pressure detection port in base plate

Example Pressure in base plate: -50 kPa

This port can be used to check that the workpiece is gripped. Note, however, that if a workpiece is dropped, the vacuum saving valves will be closed, which will increase the vacuum pressure in the base plate and may prevent detection of the drop of the workpiece.

Suction Plate

■ 2 suction plates can be selected according to the workpiece size.

Vacuum saving valve type

Significantly suppresses vacuum pressure drop when used with multiple workpieces or when workpiece is smaller than the suction plate.
 → Various-sized workpieces can be adsorbed by 1 unit.

Mesh filter
 Measures against dust
 Mesh size $\phi 0.2$ mm
 (Guide)

No restrictions on orientation during the adsorption
 Vertical transfer is possible.

Fixed orifice type

Suitable for use with workpiece that is approximately same size as suction plate
 Suppresses vacuum pressure drop

* The above illustration is only for reference and differs from the actual construction.

■ 2 foam thicknesses can be selected according to the workpiece surface shape.

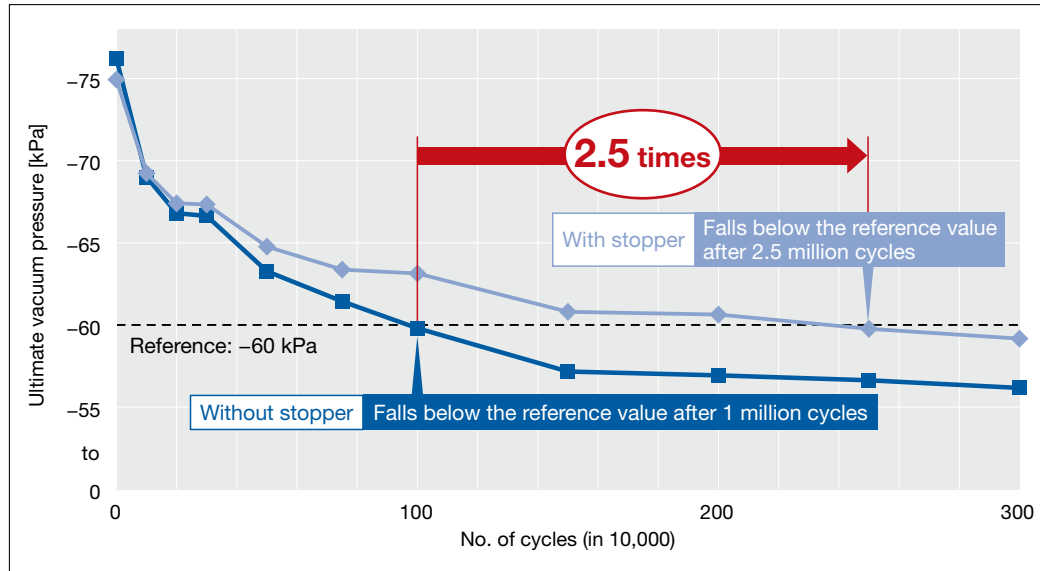

Improved foam durability due to stopper

By mounting a stopper, the amount of foam compression can be regulated. This reduces the collapse of cells within the foam during suction.

Number of cycles: Improved by more than 2 times

(Comparison under SMC's test conditions, without a stopper)

Number of Cycles and Ultimate Vacuum Pressure

Vacuum saving valve type Image

* Based on SMC's test conditions at 70% of compression.

Suction Plate

Suction Plate Selection Guide

Foam size		400 mm x 240 mm		Vacuum saving valve type		Fixed orifice type	
Number of ejector assemblies	Standard supply pressure* ³ [MPa]	Suction area [%]* ⁴	100%	Approx. 50%	100%	Approx. 50%	
		Number of suction holes [pcs.]	91/91	42/91	91/91	42/91	
		Workpiece: Acrylic plate					
2 pcs.	0.58	Vacuum pressure [kPa]* ¹	-75.0	-3.6	-75.0	-11.1	
		Lifting force [N]* ²	2144	—* ⁵	2144	146	
		Lifting force considering safety factor [N]	Horizontal lifting (Safety factor: 4)	536	—	536	36
			Vertical lifting (Safety factor: 8)	268	—	268	18
4 pcs.	0.6	Vacuum pressure [kPa]* ¹	-75.0	-57.0	-75.0	-27.6	
		Lifting force [N]* ²	2144	752	2144	364	
		Lifting force considering safety factor [N]	Horizontal lifting (Safety factor: 4)	536	188	536	91
			Vertical lifting (Safety factor: 8)	268	94	268	45
6 pcs.	0.6	Vacuum pressure [kPa]* ¹	-75.0	-61.2	-75.0	-33.6

200120BM2			2: 2 pcs.					

* The vacuum saving valve type has a stopper, and the fixed orifice type has no stopper.

Vacuum Gripper System Specifications

Number of ejector assemblies	1	2	3
Fluid	Air		
Operating pressure range [MPa]	0.3 to 0.7		
Operating temperature range [°C]	5 to 50		
Standard supply pressure [MPa]	0.45		
Max. vacuum pressure [kPa]	-63	-62	-60
Air consumption [L/min (ANR)]	92	177	257
Weight [kg]	Size 300 x 180*1	1.8	
	Size 200 x 120*2	1.3	—
Power supply voltage [V]	24 VDC ±10%		
Power consumption [W]	1.4		
Supply valve/Release valve	Equivalent to JSY3140-5MOZ-□		
Vacuum pressure switch	Equivalent to ZSE10-00-□		

*1 For ZGSNPK-300180AM3-RY1C8

*2 For ZGSNPK-200120AM2-RY1C8

Refer to the JSY3000 series **Web Catalog** for the specifications of the supply valve and release valve.
Refer to the ZSE10 series **Web Catalog** for vacuum pressure switch specifications.

JSY3000

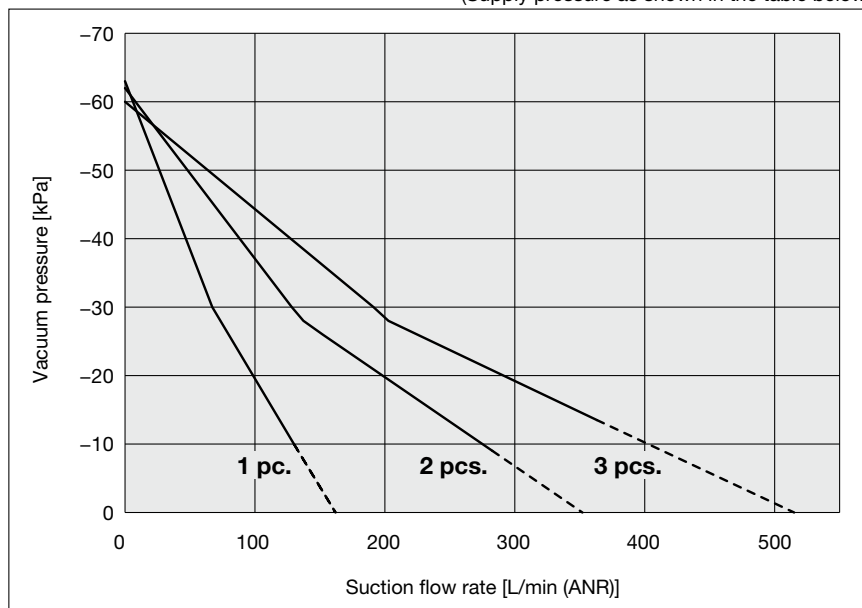

ZSE10

Foam Size: 400 mm x 240 mm

Ejector Flow Rate Characteristics (Reference value)*1

(Supply pressure as shown in the table below)

*1 Suction flow rates are measured under SMC test conditions and are not guaranteed. The dotted lines and values in parentheses in the table below are estimates based on measured values.

Foam Size: 300 mm x 180 mm
Foam Size: 200 mm x 120 mm

Connector Cable
Robot Mounting Flange

Suction flow rate for each number of ejector assemblies

Number of ejector assemblies	Supply pressure [MPa]	Suction flow rate [L/min (ANR)] for each vacuum pressure [kPa]					
		0	-10	-20	-30	-40	-50
1 pc.	0.45	(162)	130	99	67	47	26
2 pcs.		(352)	275	198	128	88	48
3 pcs.		(515)	(407)	292	191	127	63

Exhaust Noise (Reference value)

Exhaust noise [dB(A)]	Size 300 x 180	64
		Size 200 x 120

* Actual values under SMC's measurement conditions (Not guaranteed values)

Ejector Exhaust Characteristics (Reference value)*1

*1 Measured under SMC test conditions and are not guaranteed

Specific Product Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For vacuum equipment precautions, refer to the “Handling Precautions for SMC Products” and the “Operation Manual” on the SMC website: <https://www.smcworld.com>

Handling

Warning

When the foam comes into contact with a workpiece, do not put a finger between the foam and the workpiece; it can be caught during suction.

Caution

- 1. Strictly observe the precautions on vacuum equipment and safety when using the product.**
Take safety measures so that any accident, such as the dropping of a workpiece, does not occur during adsorption transfer.
- 2. Use the product within the specification range.**
Use exceeding the voltage may result in serious damage due to reduced product performance.
- 3. Exhaust air is released from the opening in the product.**
Therefore, this exhaust air opening must not be blocked or restricted.
- 4. Before suction, press the foam onto the workpiece so that the foam adapts to the unevenness of the workpiece surface in order to avoid the suction failure.**
It is recommended that the foam is compressed to approximately 50% of its original thickness.
- 5. Do not pressurize the product with the ejector cover removed; ejector assembly may jump out.**

Environment

Warning

This product is not designed to be explosion proof, dustproof, or drip proof.

Do not use in an environment where flammable gas or explosive gas is present.

Caution

If liquids such as water, oil, or chemicals are adsorbed, it may accumulate inside the product causing damage and reducing the performance. Therefore, this product cannot be used in an environment where liquids such as water, oil content, or chemicals are present.

In addition, if the product adsorbs a workpiece that is adhered to such liquids, it will reduce the product life and require early maintenance. Do not use the product in a place where static electricity is a problem. Otherwise, failure or malfunction of the system can result.

Design

Warning

Design the equipment with safety in mind, taking into account a vacuum pressure drop caused by a power or air supply failure.

Provide preventive measures against the fall of workpieces where this may cause danger.

Maintenance

Warning

Perform maintenance inspection according to the procedures indicated in the operation manual.

If handled improperly, malfunction or damage of the product may occur.

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components
IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1: Robots etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. SMC products cannot be used beyond their specifications. They are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not allowed.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, combustion equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

Caution

SMC develops, designs, and manufactures products to be used for automatic control equipment, and provides them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not allowed.

Products SMC manufactures and sells cannot be used for the purpose of transactions or certification specified in the Measurement Act of each country. The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) **Suction cups (Vacuum pads) are excluded from this 1 year warranty.**

A suction cup (vacuum pad) is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the suction cup (vacuum pad) or failure due to the deterioration of rubber material are not allowed by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Revision History

Edition B * Foam sizes 300 mm x 180 mm and 200 mm x 120 mm have been added.
* The number of pages has been increased from 16 to 40.

 **Safety Instructions** Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.
