Compact Cylinder

Standard	ø12, ø16
ISO Standards (21287)	ø20, ø25, ø32, ø40, ø50, ø63, ø80, ø100

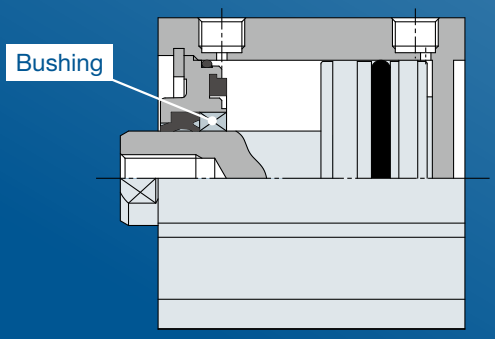
New **Bore sizes ø12 and ø16 have been added to the standard type.**

* They are not compliant with ISO Standards (21287).

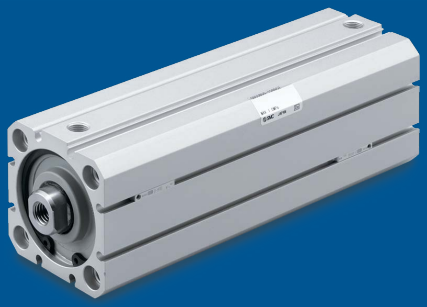
New **Smooth cylinder (C55Y) has been added. Made of stainless steel (-XC6) has been added.**

1.8 times the anti-lateral load capacity

The allowable lateral load has been improved by changing the material of the bushing.
(For ø20)



Increased the standard product's maximum stroke limit (to 300 mm)



Standardization of the Double rod (C55W) type, New Smooth cylinder (C55Y), Simple specials, and Made-to-order options

- Change of rod end shape (-XA□)
- Heat-resistant cylinder (–10°C to 150°C) (-XB6)
- Low-speed cylinder (5 to 50 mm/s) (-XB13)
- New Made of stainless steel (-XC6)

C55 Series

SMC

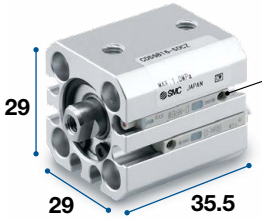
CAT.ES20-302A B

Compact Cylinder *C55 Series*

New Bore sizes ø12 and ø16 have been added. * They are not compliant with ISO Standards (21287).

ø12, 5 mm stroke dimension

ø16, 5 mm stroke dimension



Small auto switches capable
Solid state auto switch: D-M9□
Reed auto switch: D-A9□

New ISO standards (21287) compliant Smooth Cylinder (C55Y Series) has been added.

- Minimum operating pressure: 0.02 MPa
- Stable operation possible even at a low speed of 5 mm/s

	OUT	60	101	141

Moisture Control Tube
IDK Series

When operating an actuator with a small bore size and a short stroke at a high frequency, dew condensation (water droplets) may occur inside the piping depending on the conditions.
Simply connecting the moisture control tube to the actuator will prevent dew condensation from occurring. For details, refer to the **Web Catalog**.

⚠ Precautions

Be sure to read this before handling the products. For safety instructions as well as actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Specifications

Type	Pneumatic (Non-lube)
Action	Double acting, Single rod
Fluid	Air
Proof pressure	1.5 MPa
Maximum operating pressure	1.0 MPa
Minimum operating pressure	0.07 MPa
Ambient and fluid temperature	Without an auto switch magnet: –10 to 70°C (No freezing) With an auto switch magnet: –10 to 60°C (No freezing)
Lubrication	Not required (Non-lube)
Piston speed	50 to 500 mm/s
Cushion	Rubber bumper on both ends
Stroke length tolerance∗1	$^{+1.0}_{0}$ mm

∗1 Stroke length tolerance does not include the amount of bumper change.

Manufacture of Intermediate Stroke

Description	Dealing with the stroke in 1 mm increments by using an exclusive body with the specified stroke
Part no.	Refer to "How to Order" for the standard model no. (page 0-2)
Stroke range	6 to 99 mm
Example	Part no.: C55B16-47DCZ Makes 47 stroke tube

Weights

Without an Auto Switch Magnet

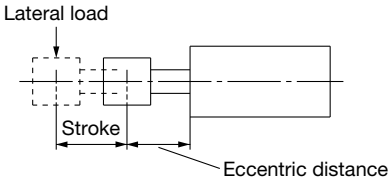
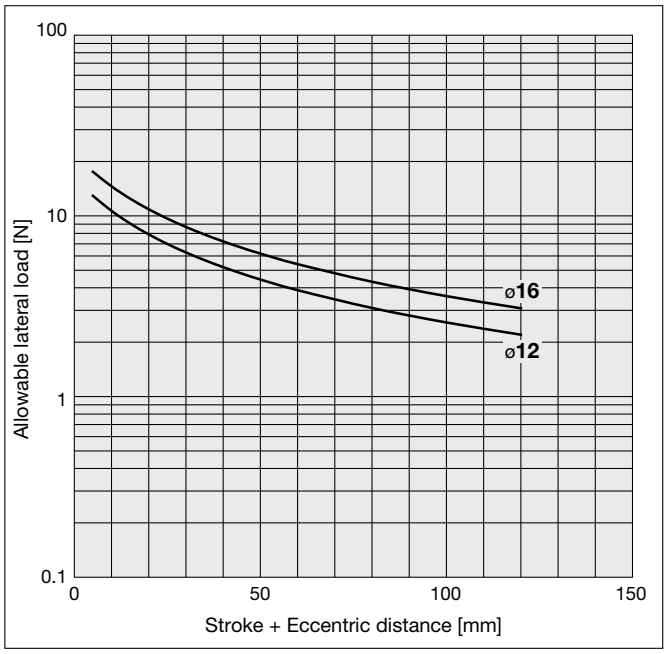
●Additional mass: Rod end male thread ····· 3 g
67 g

Allowable Lateral Load

Make sure to operate strictly within the allowable lateral load range to the rod end.
Operation outside of this range may result in shorter service life or damage to the device.

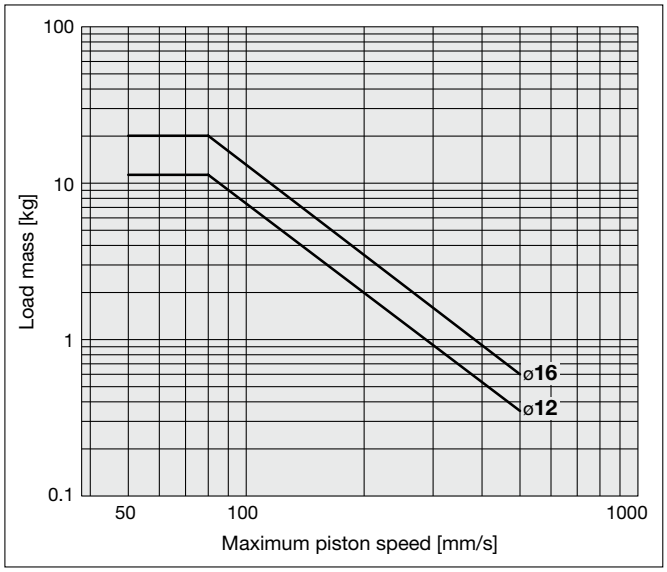




Allowable Kinetic Energy

Make sure to operate strictly within the allowable range of the load mass and maximum speed.
Operation outside of this range may cause excessive impact, which may result in the damage to the device.

Operating pressure: 1 MPa



∗ For details about model selection, refer to "Model Selection" in the **Web Catalog**.

Mounting Bolt

Through hole type mounting bolts are available.
Refer to the following for ordering procedures.
Order the actual number of bolts that will be used.

Example) CQ-M4X45L 4 pcs.

* When using the through-hole mounting bolts for bore sizes 12 and 16 mm, be sure to use the supplied flat washers.
* Mounting bolts are not available when the stroke is over 30 mm. Secure the cylinder with both ends of the cylinder tube tapped or prepare mounting bolts separately.

Type: Hexagon socket head cap screw
Material: Chromium molybdenum steel
Surface treatment: Zinc chromated

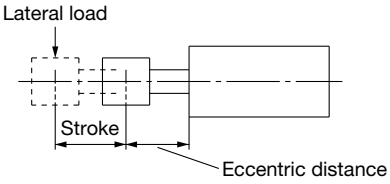
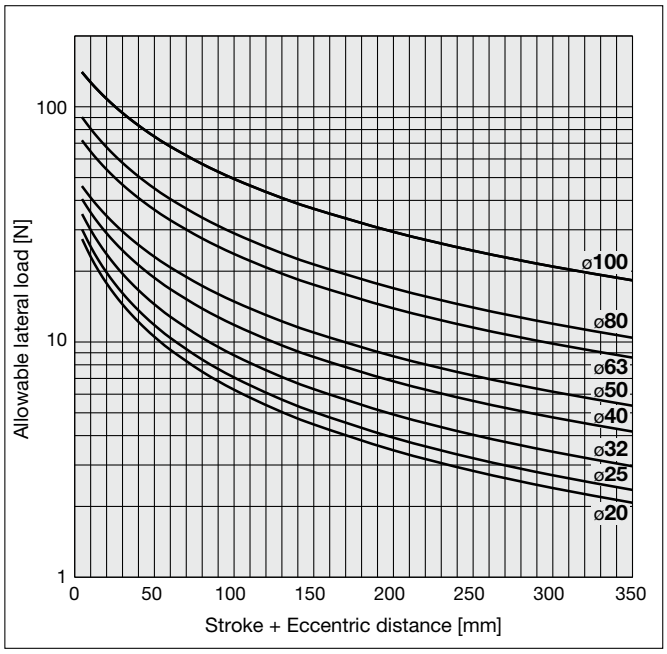
Allowable Lateral Load

Make sure to operate strictly within the allowable lateral load range to the rod end.
Operation outside of this range may result in shorter service life or damage to the device.

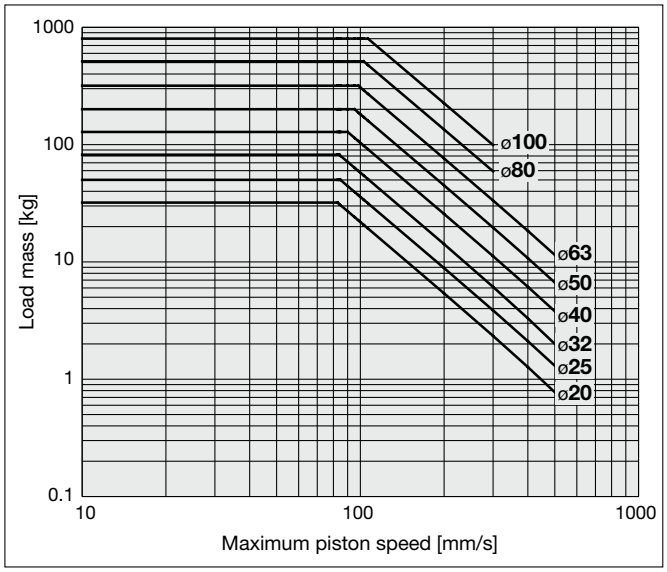




Allowable Kinetic Energy

Make sure to operate strictly within the allowable range of the load mass and maximum speed.
Operation outside of this range may cause excessive impact, which may result in the damage to the device.

Operating pressure: 1 MPa



∗ For details about model selection, refer to "Model Selection" in the **Web Catalog**.

Mounting Bolt

Through hole type mounting bolts are available.
Refer to the following for ordering procedures.
Order the actual number of bolts that will be used.

Example) CQ-M4X45L 4 pcs.

* When using the through-hole mounting bolts for bore sizes 20 to 63 mm, be sure to use the supplied flat washers.
* Mounting bolts are not available when the stroke is over 100 mm (or 50 mm with bore sizes ø20 and ø25). Secure the cylinder with both ends of the cylinder tube tapped or prepare mounting bolts separately.

Type: Hexagon socket head cap screw
Material: Chromium molybdenum steel
Surface treatment: Zinc chromated

⚠ Precautions

Be sure to read this before handling. Refer to the back cover for Safety Instructions. For actuator and auto switch precautions, refer to "Handling Precautions for SMC Products" and the Operation Manual on the SMC website: https://www.smcworld.com

Specifications

Type		Pneumatic (Non-lube)
Action		Double acting, Double rod
Fluid		Air
Proof pressure		1.5 MPa
Maximum operating pressure		1.0 MPa
Minimum operating pressure		0.05 MPa (ø20 to ø63), 0.03 MPa (ø80, ø100)
Ambient and fluid temperature		Without auto switch: –10 to 70°C (No freezing) With auto switch: –10 to 60°C (No freezing)
Cushion		Rubber bumper on both ends
Stroke length tolerance∗1		$^{+1.0}_{0}$ mm
Piston speed	**ø20 to ø63**	50 to 500 mm/s
	ø80, ø100	50 to 300 mm/s

∗1 Stroke length tolerance does not include the amount of bumper change.

Standard Strokes

Bore size [mm]	Standard stroke [mm]
20 to 63	5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 60, 80, 100, 125, 150
80, 100	10, 15, 20, 25, 30, 35, 40, 45, 50, 60, 80, 100, 125

Manufacture of Intermediate Stroke

Description	Dealing with the stroke in 1 mm increments by using an exclusive body with the specified stroke
Part no.	Refer to "How to Order" for the standard model no. (page 10)
Stroke range	6 to 149 mm
Example	Part no.: C55WB32-78DCZ Makes 78 stroke tube

Weights

Without an Auto Switch Magnet

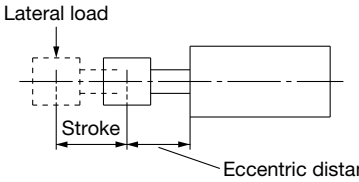
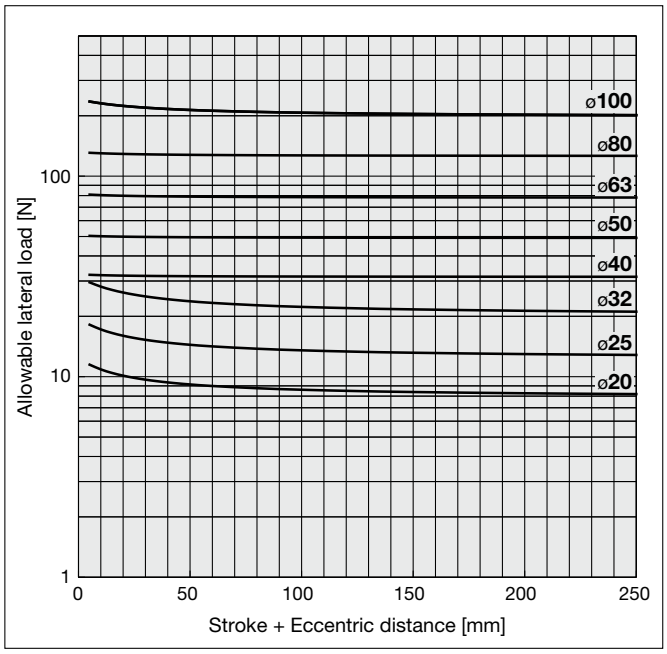
Allowable Lateral Load

Make sure to operate strictly within the allowable lateral load range to the rod end.
Operation outside of this range may result in shorter service life or damage to the device.

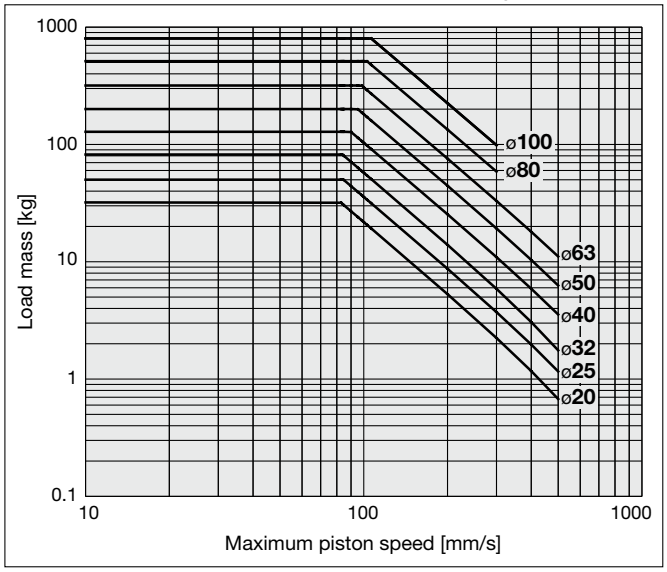




Allowable Kinetic Energy

Make sure to operate strictly within the allowable range of the load mass and maximum speed.
Operation outside of this range may cause excessive impact, which may result in the damage to the device.

Operating pressure: 1 MPa



∗ For details about model selection, refer to "Model Selection" in the **Web Catalog**.

Mounting Bolt

Through hole type mounting bolts are available.
Refer to the following for ordering procedures.
Order the actual number of bolts that will be used.

Example) CQ-M4X45L 4 pcs.

* When using the through-hole mounting bolts for bore sizes 20 to 63 mm, be sure to use the supplied flat washers.
* Mounting bolts are not available when the stroke is over 100 mm (or 50 mm with bore sizes ø20 and ø25). Secure the cylinder with both ends of the cylinder tube tapped or prepare mounting bolts separately.

Type: Hexagon socket head cap screw
Material: Chromium molybdenum steel
Surface treatment: Zinc chromated

∗1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance.

∗2 The 1 m lead wire is only applicable to the D-A93.

∗ Solid state auto switches marked with a "○" are produced upon receipt of order.

Lead wire length symbols: 0.5 m·····Nil (Example) M9NW
1 m····· M (Example) M9NWM
3 m····· L (Example) M9NWL
5 m····· Z (Example) M9NWZ

∗ Since there are other applicable auto switches than listed above, refer to the **Web Catalog** for details.

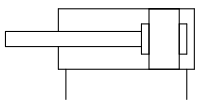
∗ Auto switches are shipped together with the product but do not come assembled.

∗ **The external dimensions are the same as those of the ISO standards compliant compact cylinder, double acting, single rod.**

Specifications

Proof pressure		1.05 MPa
Maximum operating pressure		0.7 MPa
Minimum operating pressure		0.02 MPa
Piston speed	**ø20 to ø63**	5 to 500 mm/s
	ø80, ø100	5 to 300 mm/s
Allowable leakage rate		0.5 L/min (ANR) or less
Specifications other than the above		Same as the standard type

Symbol **Rubber bumper**



Replacement Parts/Seal Kit

Bore size	Kit no.	Contents
20	CQSY20-PS	Piston seal 1 pc. Rod seal 1 pc. Gasket 1 pc. Grease pack (10 g) 1 pc.
25	CQSY25-PS	
32	CQ2Y32-PS	
40	CQ2Y40-PS	
50	CQ2Y50-PS	
63	CQ2Y63-PS	
80	CQ2Y80-PS	
100	C55Y100-PS	

When maintenance requires only grease, use the following part numbers to order.

Grease pack part number **GR-L-005** (5 g)
GR-L-010 (10 g)
GR-L-150 (150 g)

Smooth Cylinders
Specific Product Precautions 1

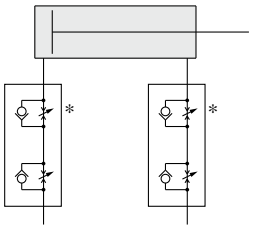
Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Recommended Pneumatic Circuit

⚠ Warning

Horizontal Operation

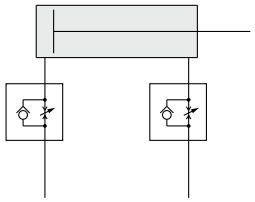
I



Dual speed controller

Speed is controlled by meter-out circuit. Using concurrently the meter-in circuit can alleviate the stick-slip. More stable low speed operation can be achieved than meter-in circuit alone.

II

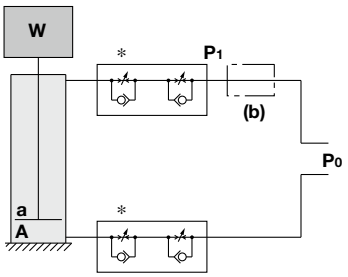


Meter-in speed controller

Meter-in speed controllers can reduce lurching while controlling the speed. The two adjustment needles facilitate adjustment.

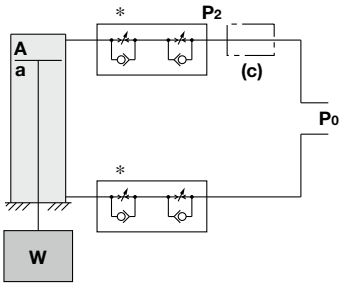
Vertical Operation

I



(1) Speed is controlled by meter-out circuit. Using concurrently the meter-in circuit can alleviate the stick-slip.*
(2) Depending on the size of the load, installing a regulator with check valve at position **(b)** can reduce lurching during descent and operation delay during ascent.
As a guide,
when **W + P0a > P0A**,
adjust **P1** to make **W + P1a = P0A**.

II



(1) Speed is controlled by meter-out circuit. Using concurrently the meter-in circuit can alleviate the stick-slip.*
(2) Installing a regulator with check valve at position **(c)** can reduce lurching during descent and operation delay during ascent.
As a guide,
adjust **P2** to make **W + P2A = P0a**.

W: Load (N) **P0**: Operating pressure (MPa) **P1, P2**: Reduced pressure (MPa) **a**: Rod side piston area (mm^2) **A**: Head side piston area (mm^2)

Design

⚠ Caution

1. For cylinders with long strokes, sliding resistance will increase due to the deflection of the piston rod and other factors. Take measures such as the installation of a guide.

2. Do not apply excessive lateral load to the piston rod.
Note 1) Easy checking method
Minimum operating pressure after the cylinder is mounted to the equipment (MPa) = Minimum operating pressure of cylinder (MPa) + {Load weight (kg) x Friction coefficient of guide/Sectional area of cylinder (mm^2)}
If smooth operation is confirmed within the above value, the load on the cylinder is the resistance of the thrust only and it can be judged as having no lateral load.

3. Design the system to prevent vibration from being applied to the cylinder.
A malfunction may occur due to the vibration.

4. Avoid using a guide with obvious variations in operating resistance.
Operation may become unstable when using a guide that manifests variations in operating resistance, or when the external load changes.

5. Avoid a system structure in which the mounting orientation changes.
Operation may become unstable if the mounting orientation changes.

6. Avoid operation where the temperature fluctuates greatly. Also, when using at low temperatures, make sure that frost does not form inside the cylinder and on the piston rod.
Operation may become unstable.

7. Do not use the product at a high frequency.
Use it at 30 cpm or less as a guideline.

8. Adjust the speed in accordance with the operating environment.
When the operating environment changes, the speed adjustment will be off unless it is reset to reflect operation in the new environment.

Smooth Cylinders
Specific Product Precautions 2

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

Pneumatic Circuit

⚠Caution

1. The piping length between the speed controller and the cylinder port must be kept as short as possible.
If the speed controller and the cylinder port are far apart, speed adjustment may be unstable.

2. Use a speed controller for low speed operation to easily adjust for low speed operation or a dual speed controller (ASD series) to prevent cylinders from popping out.
(When the speed controller for low speed operation is used, the maximum speed may be limited.)
Refer to "Recommended Pneumatic Circuit" on page 17-2.

Mounting

⚠Caution

1. Do not apply excessive lateral load to the piston rod.
Note 1) Easy checking method
Minimum operating pressure after the cylinder is mounted to the equipment (MPa) = Minimum operating pressure of cylinder (MPa) + {Load weight (kg) x Friction coefficient of guide/Sectional area of cylinder (mm^2)}
If smooth operation is confirmed within the above value, the load on the cylinder is the resistance of the thrust only and it can be judged as having no lateral load.

Lubrication

⚠Caution

1. Operate without lubrication from a pneumatic system lubricator.
A malfunction may occur when lubricated in this fashion.

2. Only use the grease recommended by SMC.
The use of grease other than the specified type can cause a malfunction and particulate generation.
- Order using the part numbers on page 17-1 when only maintenance grease is needed.

3. Do not wipe out the grease in the sliding part of the air cylinder.
Doing so may cause a malfunction.

Air Supply

⚠Caution

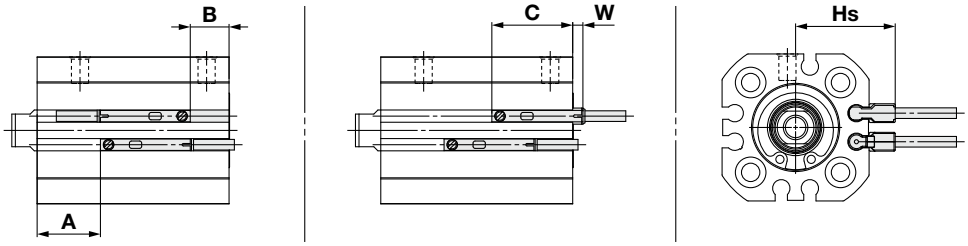
1. Take measures to prevent pressure fluctuation.
A malfunction may occur with the fluctuation of pressure.

Auto Switch Mounting

Auto Switch Proper Mounting Position (Detection at stroke end) and Mounting Height

Solid state auto switch
D-M9□
D-M9□W
D-M9□A
D-M9□V
D-M9□WV
D-M9□AV

Reed auto switch
D-A9□
D-A9□V



* Figures in the table below are used as a reference when mounting the auto switches for stroke end detection. Adjust the auto switch after confirming the operating condition in the actual setting.
* The value of “W” in the table means the amount of auto switch protrusion from the body end surface.
* The value of "Hs" in the table is for the relevant auto switch (D-M9□ (W) (A) V/A9□V).

For ø12, ø16

The dimensions inside ( ) is for D-A90 and D-A93. [mm]

Auto switch model / Bore size	D-M9□/M9□V D-M9□W/M9□WV M9□AV					D-M9□A				D-A9□/A9□V				
	A	B	C	W	Hs	A	B	C	W	A	B	C	W	Hs

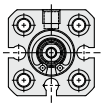
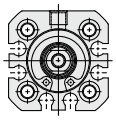
The Number of Surfaces and Grooves Where an Auto Switch Can Be Mounted

For ø12, ø16

Auto switches can be mounted on any of the three sides, there are two round grooves on each side. However, for ø12 bore, there is only one round groove.



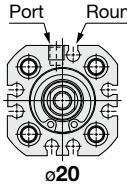
ø12



ø16

For ø20 to ø100

Auto switches can be mounted on any of the four sides, there are two round grooves on each side.
However, for ø20 bore, there is only one round groove on the ported side.



ø20

ø25 to ø100

Operating Range

[mm]

Auto switch model	Bore size									
	12	16	20	25	32	40	50	63	80	100
D-M9□(V) D-M9□W(V) D-M9□A(V)	3	4	5	4.5	5	4	4.5	5	7	8
D-A9□(V)	6	7.5	9	9	9	9	9	10.5	10.5	10.5

∗ Values which include hysteresis are for guideline purposes only, they are not a guarantee (assuming approximately ±30% dispersion) and may change substantially depending on the ambient environment.

Minimum Stroke for Auto Switch Mounting

[mm]

Number of auto switches	D-M9□(V)	D-M9□W(V) D-M9□A(V) D-A9□(V)
1	5	5
2	5	10

∗ If the stroke is short, be careful to ensure sufficient space for a lead wire.

Auto Switch Mounting

When tightening an auto switch mounting screw, use a precision screwdriver with a handle diameter of 5 to 6 mm.

[N·m]

Auto switch model	Tightening torque
D-M9□(V) D-M9□W(V) D-A9□(V)	0.05 to 0.15
D-M9□A(V)	0.05 to 0.10

Other than the applicable auto switches listed in "How to Order", the following auto switches are mountable.

∗ Normally closed (NC = b contact) solid state auto switches (D-M9□E(V)) and solid state auto switch D-F8 type are also available. For details, refer to the **Web Catalog**.
∗ With pre-wired connector is also available for solid state auto switches. For details, refer to the **Web Catalog**.

C55 Series
Simple Specials

The following changes are dealt with through the Simple Specials System.

For details, refer to the Simple Specials in the Web Catalog.
https://www.smcworld.com

1 Change of Rod End Shape

Symbol
-XA1 to 23, -XA26 to 30

Applicable Series

Series	Description	Action	Bore size	Symbol for change of rod end shape
C55	Standard type	Double acting, Single rod	20, 25	XA1, XA2, XA6 XA7, XA11, XA17 XA18
			32 to 100	XA1 to 23, XA26 to 30

⚠ Precautions

- SMC will make appropriate arrangements if no dimension, tolerance, or finish instructions are given in the diagram.
- Standard dimensions marked with "*" will be as follows to the rod diameter (D). Enter any special dimension you require.
  D ≤ 6 → D–1 mm 6 > D ≤ 25 → D–2 mm
- For the XA17 and XA18, the male thread diameter cannot be the same as the piston rod external diameter.
- Please contact SMC separately for piston rod end pattern part numbers other than those in the table to the left or for other manufacturing requirements.
- If MM on the male thread is changed from the standard dimension, the rod end nut will not be included.

C55 Series
Made to Order Common Specifications

Please contact SMC for detailed dimensions, specifications, and delivery times.

Made to Order

1 Heat-resistant Cylinder (–10 to 150°C)

Symbol **-XB6**

The seal material and grease used in this air cylinder have been changed so that it can be used at temperatures between –10 up to 150°C.

Description	Model	Action	Note
Compact cylinder	**C55**	Double acting, Single rod	Excluding a cylinder with an auto switch magnet
	C55W	Double acting, Double rod	

* Operate without lubrication from a pneumatic system lubricator.
* The maintenance period of this cylinder differs depending on the operating temperature, but the guideline for replacement is 1 million operating cycles.
* Models with a rubber bumper will be dealt with as a special order.

How to Order

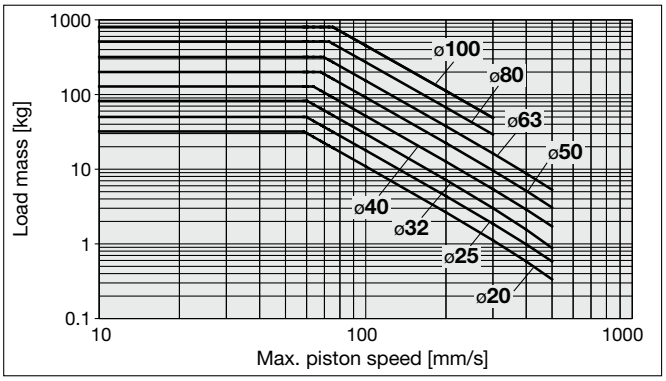
Standard model no. **D(M)Z – XB6**

Heat-resistant cylinder

Specifications

Ambient temperature range	–10°C to 150°C
Seal material	Fluororubber
Grease	Heat-resistant grease
Rubber bumper	None
Allowable kinetic energy	Refer to the graph below.
Specifications other than the above and dimensions	Same as the standard type

Allowable Kinetic Energy



⚠Warning

Precautions

Be aware that smoking cigarettes, etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.
This cylinder does not come with a built in rubber bumper.
Strictly adhere to the allowable load mass and the maximum piston speed.

2 Low-speed Cylinder (5 to 50 mm/s)

Symbol **-XB13**

Stick-slip phenomenon can be prevented, and smooth operation can be achieved even at lower driving speeds between 5 to 50 mm/s.

Description	Model	Action	Note
Compact cylinder	**C55**	Double acting, Single rod	Available for 150 mm stroke or less (or 125 mm or less for ø80 and ø100)

* Operate without lubrication from a pneumatic system lubricator.
* For the speed adjustment, use speed controllers for controlling at lower speeds. (AS-FM/AS-M series)

How to Order

Standard model no. **–XB13**

Low-speed cylinder

Specifications

Piston speed	5 to 50 mm/s
Dimensions	Same as the standard type
Specifications other than the above	Same as the standard type

⚠Warning

Precautions

Be aware that smoking cigarettes, etc., after your hands have come into contact with the grease used in this cylinder can create a gas that is hazardous to humans.

3 Made of Stainless Steel

Symbol **-XC6**

Suitable for the cases it is likely to generate rust by being immersed in the water and corrosion.

Description	Model	Action	Note
Compact cylinder	**C55**	Double acting, Single rod	
	C55W	Double acting, Double rod	

How to Order

Standard model no. **–XC6**

Made of stainless steel

Specifications

Parts changed to stainless steel	Piston rod, Retaining ring, Rod end nut (Male thread only)
Specifications other than above	Same as the standard type

⚠ Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of **"Caution," "Warning"** or **"Danger."** They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

⚠ Danger : **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

⚠ Warning: **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Caution: **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components
ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components
IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1:Robots
etc.

⚠ Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Our products cannot be used beyond their specifications. Our products are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not covered.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

⚠ Caution

We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not covered.

Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.
The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".
Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
   Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided.
   This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) **Vacuum pads are excluded from this 1 year warranty.**
A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.
Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

⚠ Safety Instructions	Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
